Employment & Project History

Freelance Developer

- Built a diverse portfolio of successful projects showcasing proficiency in React JS, Node JS, and Figma integration, attracting new clients and opportunities.

- Developed and maintained responsive web applications using React JS, delivering user-friendly interfaces and ensuring optimal performance on various devices.

- Employed React Router to create dynamic, single-page applications (SPAs) that enhanced user navigation and experience, resulting in increased user engagement.

- Integrated third-party APIs and libraries into web applications, expanding functionality and providing users with access to external data and services.

Realtor/Transaction Coordinator/Assistant Property Manager | First Properties of the Carolinas

- Developed and maintained a client relationship management (CRM) system, enhancing communication and streamlining processes.

- Collaborated with a multidisciplinary team, including architects, contractors, and legal experts, to ensure seamless property transactions.

- Managed a high volume of real estate transactions, ensuring accurate and timely documentation while maintaining data integrity.

Happy Cow | A Dairy-Free Recipe Application

- Demonstrated proficiency in front-end development, API integration, and mobile-responsive design techniques to create a modern web application.

- Utilized version control tools like Git and GitHub for efficient code collaboration and project management.

- Designed and integrated a user-friendly navigation menu that adapts seamlessly to various screen sizes, ensuring a consistent user experience across desktop and mobile devices.

Clueo Candles | Environmentally friendly candle e-commerce business

- Implemented local storage to maintain cart system for better user experience.

- Created a data store to maintain state and functions used throughout the app via Redux.

- Incorporated TailwindCSS to ensure a mobile-first and responsive development process

- Optimized application performance by identifying and addressing bottlenecks, reducing load times, and enhancing overall responsiveness.
